

Engineering Systems Inc. PRESS RELEASE
For Immediate Release

Mel Underwood Presents at 2011 Structures Congress

MIAMI, FL - - 4/14/2011 - - [Mel A. Underwood](#), P.E., Structural Engineer at [Engineering Systems Inc. \(ESI\)](#) gave a presentation at the American Society of Civil Engineers/Structural Engineering Institute's [2011 Structures Congress](#) in Las Vegas, NV on April 14th, 2011, on the topic of *Forensic Investigation of Hurricane Related Damages to Mortar-Set Roof Tile Installations in the South Florida Region*. Mr. Underwood's paper was also published as part of the Technical Proceedings from the conference.

Mr. Underwood has been actively involved in the analysis, design, construction inspection, and forensic investigation of residential, commercial, industrial, and transportation related structures. Mr. Underwood also has experience in determination of structural and material failures as related to storm damage, water intrusion, improper construction techniques, and normal wear and tear.

Mr. Underwood specializes in property loss investigations, structural forensic investigations, building materials failure assessments, construction monitoring, weather damage/water intrusion, and repair and restoration. He is a licensed Professional Engineer (P.E.) in both Florida and Michigan. Mr. Underwood works out of the [Miami office](#) and can be reached by phone at 786-301-5491 or by email at maunderwood@esi-fl.com.
